Versatile manufacturing professional with hands-on experience as Chief Ballistician and Head of Manufacturing at Minuteman Industries LLC. Skilled in ammunition development, machine maintenance, employee training, and ATF compliance. Adept at process improvement, safety protocols, and technical documentation. Proficient in Microsoft Office and production environments, with a strong commitment to quality and efficiency.

Authorized to work in the US for any employer

Work experience

Chief Ballistician, Head of Manufacturing

Minuteman Industries LLC | Vancouver, WA

May 2021 to Present

- Research and develop new ammunition formulas, refining both new and existing recipes to improve performance and meet evolving industry standards.
- Conduct field testing of new ammunition formulas and calibers, evaluating velocity, projectile expansion, penetration, and cartridge integrity to ensure compliance with FBI standards.
- Record and document detailed results of ammunition field testing, enabling data-driven improvements and regulatory compliance.
- Service, maintain, and modify machine components to streamline efficiency, develop new manufacturing procedures, and document process improvements for operational consistency.
- Train new employees to competency through instruction, demonstration, and supervision, devising and conducting assessments to evaluate apprentice aptitude.
- Utilize ATF E-forms (4473, PTA's, NICS, etc.) to ensure regulatory compliance in all manufacturing and sales processes.
- Manage procurement of machine replacement parts and manufacturing supplies using a corporate card, ensuring uninterrupted production operations.
- Use Quick Loads program to chart, evaluate, and build new ammunition formulas, enhancing product development accuracy.
- Manufacture and inspect firearm ammunition to meet quality standards, ensuring reliability and safety for end users.
- Package and label ammunition for sale, maintaining accuracy and compliance with industry regulations.
- Maintain strict adherence to safety protocols, PPE use, and correct procedures to ensure a safe manufacturing environment.

Production Specialist

WaferTech, LLC | Camas, WA

September 2018 to May 2021

- Tend machines to ensure constant wafer flow through photo area by monitoring computer systems and physically moving wafers, maintaining production efficiency.
- Monitor and troubleshoot equipment, conduct statistical process control stacking, and perform both visual and automated wafer inspections to uphold quality standards.
- Communicate equipment status to supervisors and record production details on computer systems, supporting operational transparency and traceability.
- Achieved US driver license status as of January 15th, expanding operational flexibility for shift and logistics support.

Blanket Operator

Pendleton Woolen Mills | Vancouver, WA

April 2017 to September 2018

- Measure and cut blankets, sew labels and patches, and perform Felt Bind, Serge, and Overcast for specific orders to meet customer specifications.
- Screen for blanket defects, ensuring only high-quality products proceed to packaging and shipment.

- Package and box blankets efficiently, maintaining accuracy and presentation standards for retail and wholesale distribution.
- Maintain proper safety equipment usage and adhere to safety procedures, reducing workplace incidents and ensuring compliance.

Information Specialist

Clark College Economic & Community Development Department | Vancouver, WA

November 2015 to April 2017

- Answer phone calls, file student records, and draw up lesson plans, ensuring smooth administrative operations.
- Utilize Microsoft Excel, Word, PowerPoint, and Outlook for daily tasks, enhancing productivity and communication.
- Plan, edit, and distribute advertising brochures, coordinating volunteer efforts for effective outreach.
- Design web graphical advertisements and write/edit newspaper ads for The Columbian, increasing program visibility and engagement.

Roof Re-constructor

Peerless | Vancouver, WA

July 2015 to January 2016

- Perform roofing, construction, and septic tank excavation, contributing to successful project completion and site safety.

Expert Painting

Portland, OR

July 2014 to October 2014

- Paint apartments and cabinets, delivering high-quality finishes and enhancing property appearance.

Assisting residents

Cascade Park Care Center | Vancouver, WA

March 2014 to May 2014

- Received 60 hours of Nursing Assistant Training while providing basic diagnostic procedures for residents.
- Assist residents with essential daily activities, supporting their comfort and well-being.
- Support nursing staff by performing delegated tasks, contributing to efficient patient care.

Janitor

Peerless Cleaning Company | Los Alamos, NM

June 2012 to July 2012

- Perform janitorial responsibilities for multiple accounts, ensuring proper and safe operation of janitorial equipment to maintain clean and safe environments.
